

COMPANY PROFILE

Aljac Fuelling Components Ltd was formed in 2001 and proudly became a member of the Elaflex group of companies in 2022.

We operate in the aviation fuel handling and processing market and specialise in supplying ground based aviation refuelling equipment. We offer our customers a wide range of the highest quality products which we either design and manufacture in house or distribute on behalf of our industry leading partners.

The company is based in the UK, near to London Heathrow Airport where we have our main office and warehouse which has substantial stocks supporting our customers outside of the EU.

The Elaflex Group is based in Hamburg, Germany where our German subsidiary company is also located. We have a large stock holding in Hamburg which supports our EU customers. Aljac is a global business with customers and local distributors located throughout the world.

The Company is founded on the core foundations of technical expertise and customer service. We retain highly qualified staff and have over 100 years of collective experience within the aviation fuel handling industry. We are considered a respected partner within this industry and regularly contribute to technical panels, writing current and future industry guidelines.

Facet Filtration Group fuel filter water separators, micro filters and clay filters for filtering aviation fuel and for general industrial filtration. We can supply new filter vessels and we hold large stocks of replacement elements to suit both Facet and their competitor's vessels.

Eaton's Carter® aviation refuelling couplings, inline pressure control/deadman valves, hydrant valves, hydrant dispenser intake couplings and tanker bottom loading systems. We hold extensive stocks of new equipment and spare parts for same day despatch.

Liquid Controls/SAMPI positive displacement bulk flow meters, electronic metering systems, control valves, and accessories.

Avery-Hardoll positive displacement bulk flow meters, electronic metering systems, control valves, and accessories.

Gammon Technical Products who specialise in aviation fuel handling equipment and consumables, including filter differential pressure gauges, contamination test kits, tank floating suction assemblies, sampling valves, and a wide range of other ancillary items.

Hammonds additive injection equipment which can be supplied on a stand alone basis or as part of bespoke custom manufactured fixed or mobile additive injection systems. This equipment has a wide range of capabilities in both the aviation and industrial markets, including the injection of anti icing additive, corrosion inhibitor, +100, biocides, ground fuel performance enhancers and marker dyes.

Elaflex aviation refuelling hose which is approved by all the major fuel suppliers. From stock we are able to supply finished hoses cut to length, fitted with approved end connections, pressure tested on Jet A1 if required and with a fully traceable Certificate of Conformity. We also hold stocks of Elaflex flexible joints and refuelling trigger nozzles.

Fjord Industrial Products high quality range of Urethane products including aircraft refuelling coupling sealing caps and protection rings, hose protection beads, and aircraft wing protection mats.

FMC Sening pneumatic tanker bottom valves, pneumatic bottom load systems and associated products.

Prokosch Aluminium ball valves for petroleum and powder tankers.

OCV pilot operated flow control valves for petroleum products.

Delta RCS wireless and wired 'deadman' control systems and spare parts.

Conbraco Apollo ball valves fitted with spring return 'deadman' levers.

ECHA Microbiology MicrobMonitor2® microbiological contamination test kits for aviation fuel handling applications.

Fosse fuel spillage containment and clean up kits which reflects the growing awareness of environmental considerations when handling hydrocarbon fuels.

We also manufacture our own range of static bonding and earthing equipment, 'deadman' control switches and cables, closed sampling systems for refuelling vehicles and tank farms, sandwich pattern non return valves, towable refuelling vehicles, and towable master meters. In addition we hold large stocks of the most complete range of fuel quality control equipment and consumables, including water detector capsules and paste, lead seals/sealing wire, Stainless Steel buckets, glass sampling jars, hydrometers and thermometers, fuel conductivity meters and many other items associated with the day to day task of testing and checking fuel quality.

We are able to overhaul and service any item of equipment from our extensive product range. Our staff also have the qualifications, technical background and depth of industry experience to be able to offer the highest quality professional advice to our customers on all aspects of aviation refuelling and fuel handling and we provide customer training on all our major product lines.

Our customer base is constantly expanding as our reputation for quality and service spreads. We have already successfully supplied the major oil companies and into plane refuelling operators at airports all over the world and the major fuel suppliers trust in our ability to supply the correct items in the shortest possible time. In addition we supply fuel distribution terminals and refineries and the major aviation refuelling vehicle, petroleum tanker and bulk powder tanker builders. We have also established an international distributor network to further enhance our ability to provide a premium service to our customers wherever they are located, but we consider it vital that our distributors all share our philosophy and uphold the Aljac level of customer service and technical ability.

Here are some of the larger companies and organisations who already purchase our equipment:-

Abu Dhabi National Oil Corporation.	Gammon Technical Products.	Ryanair.
AFS Germany.	Gatwick Airport Storage and Hydrant Company Ltd (GASHCO).	Shell International.
Air BP.	GRW Engineering.	Signature Flight Support.
Aircraft Service International (ASIG).	Heathrow Hydrant Operating Co.	SJS Germany.
Air Products.	Kellogg Brown and Root.	Skytanking.
APSCO Saudi Arabia.	KLM.	SLCA Spain.
ARAMCO Saudi Arabia.	KAFCO.	Spanish Intoplane Services.
Bahrain Aviation Fuelling Co.	Kuwait Aviation.	Stokota.
BP Amoco Exploration.	Manchester Hydrant Co. (MASHCO).	Swire Group.
Bristow Helicopters.	Menzies Aviation (ASIG) Limited.	Terminales Canarios.
British Aerospace.	Ministry Of Defence.	Titan Aviation.
British Airways.	Neste Oil.	Total Outre Mer.
British Petroleum.	Northair UK.	Ulrich Esterer and Co.
British Pipeline Agency (BPA).	Parker Hannifin.	United Nations.
CEPSA Aviation.	PASCO Saudi Arabia.	United States Air Force.
Chevron Texaco.	Petroineos.	Valero.
CLH Spain.	Protec Fire.	Virgin Atlantic.
CMD (CEPSA).	Police Air Support Units.	Wincanton Group.
Emirates National Oil Company.	Puma Energy.	Wolseley Group UK.
Exolum Aviation Ireland.	Qatar Jet Fuel.	World Fuel Services.
Exolum Pipeline Systems (UK).	Qinetiq.	
Exxon Mobil.	Repsol YPF.	
Fluid Transfer.	Rohr Spezialfahrzeuge.	
GALP Portugal.	Rolls Royce.
